Internal Search For Associate Dean for Research and Innovation

The College of Engineering is conducting an internal search for the Associate Dean for Research and Innovation (ADRI). The ADRI is primarily responsible for contributing to developing and overseeing the implementation of the College's research and innovation strategy. The ADRI's responsibilities include strategic planning; major research program development; faculty development; research administration; technology transfer, entrepreneurship, and intellectual property management; research coordination at the campus, university, national and international levels; industrial relations and oversight of major College research institutes and centers. Candidates are sought who have demonstrated experience in developing and sustaining a vibrant research program; excellent organizational and managerial skills; an ability to work across the College and University to build critical partnerships; an understanding of the major research sponsoring organizations; an understanding of research administration policies and processes; and familiarity with technology transfer, intellectual property and export control issues. The ADRI is a member of the Dean's leadership team and will work collaboratively with the Dean, Associate Deans, Heads of the College's Departments and Schools, the Offices of the Vice President for Research, Dean of the Graduate School and Vice Provost for Global Programs, the Directors of University Research Institutes, the Office of Technology Management, the Office of Sponsored Programs and the leadership of the other colleges to advance CoE research and innovation priorities.

The ADRI is a full-time, forty-eight week appointment with reporting responsibilities primarily to the Senior Associate Dean. Faculty members interested in this position should send a cover letter, CV and list of references to Lynn Tressler, 101 Hammond Building, lxt3@psu.edu. Applications will be considered through June 25, 2014 with an anticipated start date of August 1, 2014.
