Dear Mr. John Meier,

My name is xxxxx. I am a sophomore in chemical engineering. I need to do a patent research on beta-3-adrenoceptors in which I need to find 2 original patent filed by Glaxo Wellcome on that substance (when they are filed and when they are approved). However, after researching it for hours, the only one I can find is this http://patft.uspto.gov/netacgi/nph-Parser?Sect2=PTO1&Sect2=HITOFF&p=1&u=/netahtml/PTO/searchbool.html&r=1&f=G&l=50&d=PALL&RefSrch=yes&Query=PN/6251925. I wonder if you can help me out with this and give me suggestion on what I should do to find it. I tried to see you in the library today, but one of the staffs said that you are out for the week.

Thank you so much for your kind assistance, I really appreciate it. Hope to hear back from you soon.

Hi xxxxx,

Try using an assignee and keyword search like this

If that isn't quite it, we could try Scifinder Scholar.

Hi John,

Thank you so much for your help. I might have a follow up question, is it okay if I just shoot you an email then? Because I really do not want to disturb with your week off.

Again thank you so much for your kind assistance, I really appreciate it.

Actually I am at the USPTO for training this week, so I am surrounded by experts!

John
