

Environmental Science & Technology Letters Presents the 2017 Excellence in Review Awards

In recognition of the contribution that reviewers provide to the scientific community and the publication of scholarly research, the *Environmental Science & Technology Letters* (ES&T Letters) Associate Editors and I are proud to recognize nine reviewers for their significant contributions to the journal over the past year.

A journal exists on the goodwill and expertise of its reviewer corps. The Associate Editors rely on high-quality, constructive, and timely reviews from the more than 3800 reviewers in our database to ensure the excellence of papers that appear in *ES&T Letters*. We realize that reviewing is a time-consuming job with no tangible reward. In recognition of this, in 2015 we established the annual “Excellence in Review” award. Reviewers are selected for this award on the basis of both the quality and timeliness of their reviews, with further consideration of the number of reviews provided to the journal. All reviewers are eligible to receive this award, so several of our [Editorial Advisory Board](#) members are also being recognized with this award as they also provide a large number of reviews, in addition to providing advice on the journal focus and operations to the editors.

We take this opportunity to salute all of the individuals below for consistently providing both scholarly and timely reviews!
