

# JOIN US FOR "SPOTTED LANTERNFLY ZONES OF SYNCOPATION" (SFZ)

Syncopation is a disturbance to the normal flow of rhythm.  
Spotted lanternflies have disturbed our rhythm.

Join Penn State Lehigh Valley, in partnership with Visiting Artist Elsabé Dixon,  
to create environmentally impactful art involving the spotted lanternfly through  
Penn State University's Campus Arts Initiative.

## WHAT IS IT?

The SFZ project is a large-scale community-based artwork where arts and environmental organizations throughout the region are invited to participate. When finished, the art will be a large data map installation made entirely of adult spotted lanternfly wings that will be harvested at the end of their lifecycle.

## HOW CAN YOU PARTICIPATE?

Participation can take many forms! Including harvesting of lanternfly wings, pinning the wings, hosting workshops, and creating the artwork alongside Dixon. We will be offering short presentations about the project and solicit help regarding harvesting and pinning procedures. Please consider hosting a mini presentation that introduces the project to the public.

**If your organization would like to join us, contact us at [SFZones@psu.edu](mailto:SFZones@psu.edu).**

Co-chairs: Ann Lalik, Liz Flaherty

This project is sponsored by the Penn State Campus Arts Initiative:
