Course Description: This course is an independent study co-designed by the student and instructor. The student will gain an understanding of state immigration policy and measuring policy bundles. The study will include both theory and research methods. The student will develop an original research paper that makes a scholarly contribution and builds towards their dissertation. The final paper will ultimately be submitted to a peer reviewed journal for publication. The instructor will mentor and meet with the student on a weekly basis to discuss the material and development of the final project.

Learning Objectives:

- Critical Thinking
 - The student will read and critically evaluate literature on state immigration policy
 - The student will read, critically evaluate, and integrate literature on index construction and policy bundles
- Information Literacy and Research Skills
 - The student will complete a research project that builds on existing scholarly literature
- Program Competence
 - The student will gain a better understanding of both their specialization and research design

Methods for Learning and Teaching: This independent study will require substantial self-paced work on the part of the student. We will meet most weeks via Zoom to discuss how the study is progressing and to tackle any questions about the material.

Reaching Our Goals

E-mail Policy: I will work to respond to e-mails within 24 hours during the week and 48 hours on the weekend.

Assessing Progress Towards Our Goals

The following assessments will be used to track your progress towards meeting our course goals: response memos and a final paper. Each component represents the following percentage of your final grade:

Paper Outline	15%
Data and Code	20%
Rough Draft	15%
Final Paper	50%

We will use the following grade scale:

Letter	Percent
A	94 to 100
A-	90 to 93
B+	87 to 89
B	84 to 86
B-	80 to 83
C+	77 to 79
C	70 to 76
D	60 to 69
F	Below 60

Final Paper: Drawing from your reading on state immigration policy and index creation, you will develop an original empirical study. The final paper will be scaffolded, with an outline and rough draft due during the semester and the final paper due during Finals Week. The outline must follow the structure of the final paper and will act as a proposal for the project. After the project is refined and approved, you will produce a full rough draft. The paper should have the following format:

1. Introduction
2. Literature review and theory
3. Section explaining your methodological approach to answering your questions

4. The results of your analysis
5. Discussion
6. Conclusion

The final paper should be roughly 8,000 words. It should also be formatted based on the target journal for submission. You will also need to submit data and code for creating your state policy measure(s).

Academic Integrity Academic dishonesty is not limited to simply cheating on an exam or assignment. The following is quoted directly from the *PSU Faculty Senate Policies for Students* regarding academic integrity and academic dishonesty: “Academic integrity is the pursuit of scholarly activity free from fraud and deception and is an educational objective of this institution. Academic dishonesty includes, but is not limited to, cheating, plagiarizing, fabricating of information or citations, facilitating acts of academic dishonesty by others, having unauthorized possession of examinations, submitting work of another person or work previously used without informing the instructor, or tampering with the academic work of other students.”

All University and Penn State Harrisburg policies regarding academic integrity/academic dishonesty apply to this course and the students enrolled in this course. Refer to the following URL for further details on the academic integrity policy of Penn State Harrisburg: <https://harrisburg.psu.edu/academics/academic-guidelines-and-policies>. Each student in this course is expected to work entirely on her/his own while taking any exam, to complete assignments on her/his own effort without the assistance of others unless directed otherwise by the instructor, and to abide by University and Penn State Harrisburg policies about academic integrity and academic dishonesty. Academic dishonesty can result in an assignment of “F” or “XF” as the final grade for the student.

Disability Access

Penn State welcomes students with disabilities into the University’s educational programs. Penn State values diversity and inclusion; we are committed to a climate of mutual respect and full participation. Our goal is to create environments that are usable, equitable, inclusive, and welcoming. Every Penn State campus has a Student Disability Resources office. To receive consideration for accommodations, please contact Student Disability Resources (SDR), participate in an intake interview, provide documentation of your disability, and complete an online Introductory Questionnaire. Please know that you are not required to

already have documentation to begin the process with SDR, as SDR can assist with the process of requesting accommodations. Additional information is available on the (<https://harrisburg.psu.edu/student-disability-resources>). If the documentation supports requests for reasonable accommodations, SDR will provide you with an accommodations letter, which you can then give to your professors. Please know that requests for accommodations and support must be initiated by the student and communication with professors regarding the approved accommodations must be initiated by the student. You will receive accommodations after you give your accommodations letter to your professors. It is recommended that you share your accommodations letters with your professors as early in the semester as possible. Professors do not provide accommodations retroactively.
