

Paige Teehan

pdt7@psu.edu

Biography

Paige grew up in Williamston, SC and earned her B.S. in Biological Sciences from the University of South Carolina. After college, she eventually found her way to research by working in a parasitology lab at Clemson University. She enjoys baking, painting, martial arts, and playing with her dog.

Research

Paige joined the Dorman group in 2017. Her research focuses on determining the biological significance of environmental contaminants detected by two-dimensional gas chromatography. She hopes to link diseased populations to a causative agent and develop better methods for detecting and monitoring hazardous compounds in the environment.
