

Conner Stultz

cvs5691@psu.edu

Biography

Conner grew up in Andover, KS and moved to Tallahassee, FL to attend Florida State University. He graduated from Florida State with his B.S. in Chemistry, where he worked on determining total organic phosphorous levels in waste water treatment areas in the Everglades. Conner enjoys outdoor activities and anything that keeps him active, especially the circus arts.

Research

Conner joined the Dorman group in the fall of 2015. His research focuses on using GC-MS/MS to determine analytical methods to separate complex mixtures of PCB and dioxin like congeners, where no chemical standards exist.
