

I WAS READY TO START THE CLINICAL YEARS. FOR THE NEXT TWO YEARS, I WAS GOING TO BE WORKING AT THE HOSPITAL AND HELP TAKE CARE OF PATIENTS.

I WAS OFFICIALLY PART OF...

TEAM DOCTOR

FOR AWHILE, THE DOCTORS TRULY SEEMED TO BE THE DEFENDERS AGAINST DISEASE AND DEATH.

ONE DAY, I WAS ON MY ANESTHESIA ROTATION.

A hand-drawn diagram of an operating room layout. The diagram is divided into several labeled areas:

- RADIOLOGY**: Located at the top left, with a circle below it.
- NURSES**: Located at the top center, with two circles below it.
- CIRCULATION**: Located on the right side, with a vertical label and two boxes labeled **BLOOD** and **PRODUCTS**.
- ANESTHESIA**: Located at the bottom center, with a circle and a bell icon above it.
- MEDS**: Located at the bottom left, with a box containing symbols (wavy lines, circles, and hash marks) and a stack of boxes below it.
- TEAM**: Located on the left side, with a vertical label and a circle above it.

The central area contains a large rectangle representing the operating table, with a smaller rectangle below it. A stand with two boxes is positioned to the left of the table. A stack of boxes is positioned to the right of the table. A circle is positioned below the table.

QUICK! STABILIZE THE PATIENT
HE NEEDS AN AIRWAY
STAT. I GOT IT. TRAUMA ASSESS
HEAD LAC. BLOOD
OPEN VITALS
STABILIZE BLOOD
HE'S LOSIN BLOOD
SPLEEN
DECOMP
BRAIN
CHECK VIT
VENTILAT
BLOOD BAG
#8, #15, #18
VITALS

RIGID BELLY
3 UNITS
CUT NOW.
STAT.
GAS O2 LOW.
TOO MUCH
VITALS 2000h
OUT. SKULL
RESSION.
IS HERNIATING
TALS. HYPER
20 OF MANNITOL
VITALS 2300h
#25, #30, #38...
UNSTABLE.

THERE IS NOTHING MORE TO DO. LET'S GO TALK TO THE FAMILY. WE START ROUNDS AFTERWARDS.
