☐ Honors Course
☐ Common course number - x94, x95, x96, x97, x99
☐ Writing Across the Curriculum

First-Year Engagement Program

☐ First-Year Seminar
Course Outline

A brief outline or overview of the course content:
This course provides an introduction to the United States government and political processes. It examines the relationship between the foundations of American government (the Constitution, federalism, civil rights, and civil liberties), its political institutions (Congress, presidency, courts, and bureaucracy), its electoral processes (elections, voting, and political parties), and influences such as the media and interest groups in shaping political behavior and policy outcomes.

A listing of the major topics to be covered with an approximate length of time allotted for their discussion:
Approximately one week is allocated to each of the following topics. Content for the remaining weeks will vary with the instructor and may include extended focus on listed topics or additional topics such as varieties of democracy, foreign policy, social movements, and political ideologies.
1. The US Constitution, Design, Origin and History
2. Federalism
3. Congress
4. Presidency
5. Judiciary
6. Civil Rights and Liberties
7. Campaigns/Elections
8. Political Parties
9. Media
10. Interest Groups
11. Public Opinion
12. Bureaucracy
13. Domestic Policy

Course Description:
This course examines the American democracy by looking at the dynamic interaction between the founding ideals of the United States government, the institutions established by the Constitution, and the ongoing contest for power within and through those institutions. Students will learn how Congress, the Presidency and the Supreme Court shape law and public policy; how the electoral process influences the decisions of voters and political parties; and how the media, interest groups, political action committees, and public opinion impact political outcomes. Through these topics the course takes up questions such as, Who has a voice in American politics and why are some political actors more influential than others? Do the electoral and policy making processes uphold democratic values? How responsive is the United States government to public wants? How does the media influence citizens’ political preferences and behavior? The course both provides a foundation for further study of politics and equips students with the capacity to act politically on their own behalf and in concert with their communities. Students are empowered to interpret and pursue their interests, rights, and opportunities within the US political system in relation to the values of democratic equality and liberty the system was organized to secure, and to influence the process through which policies that shape their lives in critical ways are made.

The name(s) of the faculty member(s) responsible for the development of the course:
Name: AMY LINCH (ATL3)
Instructional, Educational, and Course Objectives:
This section should define what the student is expected to learn and what skills the student will develop.
Upon completing this course, students will be able to
1) Explain the design, logic, and function of the American political system and its impact on American politics as they will experience it as citizens
2) Critically assess the representativeness, responsiveness and distributive fairness of the American democracy
3) Exercise their rights as democratic citizens
4) Build on a strong foundation of the concepts and methods used in upper level political science classes

Evaluation Methods:
Include a statement that explains how the achievement of the educational objective identified above will be assessed. The procedures for determining students’ grades should be specifically identified.
The methods of evaluation and exact grading requirements will necessarily vary by instructor and location. Current methods of assessment include quizzes, exams, in class exercises, discussion blogs, papers and group projects. The assignment distribution in determining students’ grades might be as follows.
Quizzes 20%
midterm and final exam 50%
papers/group projects 10%
participation, in class exercises, discussion posts 20%

Relationship/Linkage of Course to Other Courses:
This statement should relate the course to existing or proposed new courses. It should provide a rationale for the level of instruction, for any prerequisites that may be specified, or for the course’s role as a prerequisite for other courses.
This course is a prerequisite for upper level courses in American politics.

Relationship of Course to Major, Option, Minor, or General Education:
This statement should explain how the course will contribute to the major, option, or minor and indicate how it may function as a service course for other departments.
The course fulfills a lower level requirement for Political Science, International Politics and Social Data Analytics majors. It may be used by non-majors to fulfill General Education and Social/Behavioral requirements.

A description of any special facilities:
N/A
When a unit submits several course changes, with or without new course proposals, a general statement covering the programmatic effects of the changes should be submitted.

Gen Ed recertification.

The course title modification is intended to facilitate students’ course selection by providing more information about the course content. The current title inaccurately specifies the scope of the course as government rather than national level politics in the United States, of which the structure of government is only one component.

Alignment with General Education Objectives

**EFFECTIVE COMMUNICATION** – the ability to exchange information and ideas in oral, written, and visual form in ways that allow for informed and persuasive discourse that builds trust and respect among those engaged in that exchange, and helps create environments where creative ideas and problem-solving flourish.

**KEY LITERACIES** – the ability to identify, interpret, create, communicate and compute using materials in a variety of media and contexts. Literacy acquired in multiple areas, such as textual, quantitative, information/technology, health, intercultural, historical, aesthetic, linguistic (world languages), and scientific, enables individuals to achieve their goals, to develop their knowledge and potential, to lead healthy and productive lives, and to participate fully in their community and wider society.

**CRITICAL AND ANALYTICAL THINKING** – the habit of mind characterized by comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating a conclusion. It is the intellectually disciplined process of conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

**INTEGRATIVE THINKING** – the ability to synthesize knowledge across multiple domains, modes of inquiry, historical periods, and perspectives, as well as the ability to identify linkages between existing knowledge and new information. Individuals who engage in integrative thinking are able to transfer knowledge within and beyond their current contexts.

**CREATIVE THINKING** – the capacity to synthesize existing ideas, images, or expertise in original ways and the experience of performing, making, thinking, or acting in an imaginative way that may be characterized by innovation, divergent thinking, and intellectual risk taking.

**GLOBAL LEARNING** – the intellectually disciplined abilities to analyze similarities and differences among cultures; evaluate natural, physical, social, cultural, historical, and economic legacies and hierarchies; and engage as community members and leaders who will continue to deal with the intricacies of an ever-changing world. Individuals should acquire the ability to analyze power; identify and critique interdependent global, regional, and local cultures and systems; and evaluate the implications for people’s lives.

**SOCIAL RESPONSIBILITY AND ETHICAL REASONING** – the ability to assess one’s own values within the social context of problems, recognize ethical issues in a variety of settings, describe how different perspectives might be applied to ethical dilemmas, and consider the ramifications of alternative actions. Individuals should acquire the self–knowledge and leadership skills needed to play a role in creating and maintaining healthy, civil, safe, and thriving communities.

What component(s) of the course will help students achieve the General Education Learning Objectives covered in the course? Provide evidence that students in the course have adequate opportunities to achieve the identified learning objectives.

1. **Key Literacies**
   The key literacy attained through PL SC 001 is political literacy. Students learn to identify how power is allocated and exercised in their society. They learn to interpret and pursue their interests, rights and opportunities within the US political system in relation to the values of democratic equality and liberty that it was organized to secure. They learn to participate fully in their communities as citizens by gaining knowledge about how political power is distributed and how they can influence the process through which policies that shape their lives in critical ways are made.

What component(s) of the course will help students achieve this General Education Learning Objectives?
Students will learn the structure of the United States national government, the function of the various branches, and the theory and practice of their interaction in creating public policy. The emphasis on both theory and practice equips students with criteria to evaluate the performance of their political representatives and hold them accountable to their obligations under the terms of the American democratic system. Similarly, topics such as the electoral system and political parties, campaigns, and elections provide students with knowledge to participate in this aspect of political life in a variety of roles from voting to pursuing political office. The emphasis on the dynamic between the structure of the political system and political behavior in shaping political change provides students with an understanding of the economic, social and political factors that contextualize their values and interests. This understanding enables students to both see the obstacles and opportunities to pursuing their own goals within those structures and envision possibilities for leadership in changing them.

Opportunities to achieve this General Education Learning Objective
Students will develop political literacy as articulated above throughout the course. Each of the course topics advances students understanding of the processes through which power operates by, within, and on the United States national government. Given the organization of the course around the design and function of the United States political system in relation to democratic representation and accountability, the topics individually and collectively develop students’ capacity to act politically on their own behalf and in concert with their communities. Class discussions and exercises focused on current political events give students the opportunity to connect the course content to their own goals and actions.

2. **Critical and Analytical Thinking**
Students develop critical and analytic thinking through investigation of the relationship between the structure and promise of the US political system and what it delivers in terms of both substantive outcomes and opportunities for action. The course fosters critical thinking through questions such as how the values of democratic equality and liberty that underwrite the system’s legitimacy are realized or foreclosed through the electoral and policy making process, how responsive government is to public wants; and how the media influences political preferences and behavior. In considering such questions student are guided to think analytically about how large scale processes are connected to micro level actions. They learn to employ different modes of reasoning in approaching problems, to recognize standards of validity and verification in constructing arguments.

What component(s) of the course will help students achieve this General Education Learning Objectives? Students will develop critical and analytic thinking through the structure of the course material and through class discussions and exercises.

Opportunities to achieve this General Education Learning Objective
The organization of the course content in terms of 1) structure and political behavior, 2) theory and practice and 3) design and function provides students with continual opportunities to develop critical and analytic thinking skills. The course lectures and text books model critical and analytic thinking about social and political processes and students are given the opportunity to exercise these skills in class discussions, essays, and analysis of current events.

How will students be assessed to determine their attainment of the Learning Objective(s) of General Education covered in this course? This assessment must be included as a portion of the student’s overall performance in this course.
Students’ mastery of the key literacy described above will be assessed through quizzes and tests and possibly through homework and in class exercises at the discretion of the instructor. Quizzes and tests assess students’ ability to identify, describe and explain various aspects of American politics. Discussions (in class and through blogs) and topic based exercises advance students recognition of the relationship between the course material and contemporary events, and give them the opportunity to develop and articulate informed opinions about political issues. Essay exams, reflection papers and papers further illustrate students’ understanding of the political process. Different versions of the course follow different assessment schemes but all use more than one of these modes of assessment.

Critical thinking skills are generally practiced through class discussions and in class exercises, and assessed through examinations, reflection papers or discussion posts. Take home or in class essay exams might ask students to apply what they have learned to novel scenarios or to interpret or respond to contemporary political events based on knowledge gleaned in the course. Some sections of the course will also use group projects and papers to assess critical thinking skills.

General Education Domain Criteria

General Education Designation: Single-Domain

GS Criteria

☐ Explain the various methods of inquiry used in the social and behavioral sciences and describe how the contributions of these fields complement inquiry in other areas

☐ Identify and explain major foundational theories and bodies of work in a particular area of social and behavioral sciences

☒ Describe the ways in which many different factors may interact to influence behaviors and/or institutions in historical or contemporary settings

☒ Explain how social and behavioral science researchers use concepts, theoretical models and data to better understand and address world problems

☒ Recognize social, cultural, political and/or ethical implications of work in the social and behavioral sciences

What components of the course will help students achieve the domain criteria selected above?

1. Describe the ways in which many different factors may interact to influence behaviors and/or institutions in historical or contemporary settings:
American National Government explicitly examines the relationship between institutions, various actors, and the outcomes of political processes. The course develops the US political system from the point of view of its formal design and explicit goals, and its historical modification through practice in response to changing circumstances and political competition. Additionally, it focuses on how institutions influence people’s perception of their interests and how they affiliate with others as political actors.

2. Explain how social and behavioral science researchers use concepts, theoretical models and data to better understand and address world problems:
American National Government introduces students to the vocabulary, data and analytic models political scientist use to research and formulate solutions to political problems. It does this in the course of describing the design and purpose of political institutions and in interrogating their effects on social policy and political behavior.

3. Recognize social, cultural, political and/or ethical implications of work in the social and behavioral sciences:
The explicit focus on civil rights and liberties in many aspects of American National Government foregrounds the political and ethical importance of social and behavioral sciences. Additionally, the course’s attention to the various factor that shape public opinion, which in turn influence the terms of political competition, enable students to see the importance of social and behavioral science to a well functioning democratic society.

Course Abbreviation and Number: PL SC 001 American Politics: Principles, Processes and Powers

Credits: 3

Prerequisites/Co-requisites/Concurrent Requirements/Recommended Preparation: None

Course Attributes/Designations: GenEd (GS), BA, US

General Education Learning Objectives:

**KEY LITERACIES** — the ability to identify, interpret, create, communicate and compute using materials in a variety of media and contexts. Literacy acquired in multiple areas, such as textual, quantitative, information/technology, health, intercultural, historical, aesthetic, linguistic (world languages), and scientific, enables individuals to achieve their goals, to develop their knowledge and potential, to lead healthy and productive lives, and to participate fully in their community and wider society.

**CRITICAL AND ANALYTICAL THINKING** — the habit of mind characterized by comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating a conclusion. It is the intellectually disciplined process of conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

Course Description:

This course examines the United States democracy by looking at the dynamic interaction between the founding ideals of the United States government, the institutions established by the Constitution, and the ongoing contest for power within and through those institutions. Students will learn how Congress, the Presidency and the Supreme Court shape law and public policy; how the electoral process influences the decisions of voters and political parties; and how the media, interest groups, political action committees, and public opinion impact political outcomes. Through these topics the course takes up questions such as, Who has a voice in American politics and why are some political actors more influential than others? Do the electoral and policy making processes uphold democratic values? How responsive is the United States government to public wants? How does the media influence citizens’ political preferences and behavior? The course both provides a foundation for further study of politics and equips students with the capacity to act politically on their own behalf and in concert with their communities. Students are empowered to interpret and pursue their interests, rights, and opportunities within the US political system in relation to the values of democratic equality and liberty the system was organized to secure, and to influence the process through which policies that shape their lives in critical ways are made.

Course Learning Objectives:

Upon completing this course, students will be able to

1) Explain the design, logic, and function of the American political system and its impact on American politics as they will experience it as citizens
2) Critically assess the representativeness, responsiveness and distributive fairness of the American democracy
3) Exercise their rights as democratic citizens
4) Build on a strong foundation of the concepts and methods used in upper level political science classes

**Course Topics**
1. The US Constitution, Design, Origin and History
2. Federalism
3. Congress
4. Presidency
5. Judiciary
6. Civil Rights and Liberties
7. Campaigns/Elections
8. Political Parties
9. Media
10. Interest Groups
11. Public Opinion
12. Bureaucracy
13. Domestic Policy

**Assessment**
Quizzes, tests, essays, in class exercises, and group projects as appropriate to course enrollment and at the discretion of the instructor.
