

LionPATH Updates 5-11-2017

Completed

- Successful release of the new student interface
 - Newswire article release 5/4
 - Message to people with faculty-staff-student roles
 - POSITIVE reviews by *The Collegian* and *Onward State*
- Completion of testing and release of Bundle #45 to production
- Release of numerous fixes and new functionality
 - Alumni interface including 2168 graduate population
 - Athletic Ticketing file
 - Mandatory Health insurance data collection screen
 - Tomorrow will send email with link to 5,000 student as initial proof of concept
 - Fix to test credit page
 - Fix to grants-in-aid
 - Fix to Higher One
 - Fix to Update Academics
 - Enhancements Starfish interface
 - Enhancements to Schedule Builder

In progress

- Working with College Scheduler (Schedule Builder) to upgrade and test additional new features which include class validation directly from Schedule Builder
- Testing first piece of automated merge code—admissions merges. We are validating that it does all the updates now handled as part of the manual process.
- Validation of iTwo Term Enrollment continuing; Student Data Advisory group convened for a 2nd time and discussed data issues. Early June launch anticipated. BI Team and Reporting Team discussing upcoming content areas.
- Fix for Pay Detail issues
- Team working on consuming the fix to the COUNTY problem now in production in the CPR. 3 pieces of code will have to be adjusted.
- Working on revisions to VZO interface for NSO; problems with post-matriculation future-dated changes
- Review of LionPATH role groups; to date 30 groups have been eliminated through consolidation; this eases the work of the ASRs.

Upcoming

- 5/25 – release of mandatory health insurance data collection to remaining population
- 5-25 – release of GRAD Student Dashboard for Research & Projects

Other

- Still waiting for follow-up on the escalation of CPR –related issues; no timeframes received for LionPATH issues.
