

LionPATH Updates 8-23-2017

Completed

- Engaged high efficiency mode for the student interface during peak activity period
- Completed first round of queries to extract course data for Courseleaf (new Bulletin system)
- DUS Max Time milestone applied for incoming 2175 and 2178 classes
- Kicked off a cross-functional LDMO group whose purpose is to focus on the user experience and how we can improve in that area

In progress/ongoing

- Undergraduate applicants self-reported grade functionality
- Work with BI Team on iTwo data roll-outs
- 6-8 team members involved in responses to various auditors—Internal and Deloitte IT auditors.
- Redesign of new public interface: public.lionpath.psu.edu
- Disaster recovery plan
- Technical Team performing initial testing of PeopleTools 8.56. All process types run to completion and are working. The fundamentals seem to be good. We are on schedule for the upgrade scheduled for Thanksgiving break 2017.
- Adding LionPATH jobs to Control-M scheduling system
- Continuing planning for 2018 mandatory health insurance initiative
- Process for handling merges of “duplicate identities” handling process in conjunction with OIS
- Team working on expectations and standards for addressing service tickets

Upcoming

- 9/1 Summer/Fall Undergrad application release (MyPennState) with self-reported grades
- Run monthly billing statements
- Roll Fall 2018 classes

Issues

- Still working with key functional offices on support model; meanwhile we are collectively not delivering support in a systematic fashion and need all offices to participate in ServiceNow.
