

A person wearing a red sweater is shown from the chest down, holding a knife with a wooden handle and a silver blade behind their back. The background is a blurred outdoor setting.

Wall Surface treatment- I love this wall treatment and part of this house, it feels very homey and lived in. I'm not sure I think the walls would have a surface treatment but for the assignment I think it would be something like this.

Floor- I imagined them to have very simple hardwood floor similar to this, maybe a darker wood but I think this is perfect.

Window-I think for this window I want to make it just one big window instead of the five.

Door- I wanted to pick a door that was simple but I kept finding doors that all looked the same and it was a bit too simple. I think this door is a good in-between.

Wall mounted lights- This was very hard, I couldn't find anything other than ceiling fan lights or lamps. I'd design these to be a bit simpler, just holder and bulb no fancy ornamentation to make it go along with everything else.

Moulding- I wanted the moulding to also be simple, I'm thinking I want moulding on the top and bottom of the wall. I'll scratch the moulding running along the windows.

All in all, I wanted the home to feel lived in and I want it to be simple, nothing fancy. In the script it said the house was past her prime, in my images things look sleek but if I were to actually do this design everything would be more worn and lived in. I think i'd go for a dark colored wood throughout the interior of the house. My images are from realtor.com and zillow, I wanted to look at houses that are actually being sold. However a lot of the more worn down houses had pictures full of trash or not many pictures of the inside. I want to make it as real as possible.
