IB Visual Arts
Unit 1
It’s About Water
Concept: Global Water Crisis

The mini filters are 5" in diameter. You could make the openings of the vessels between 5" and 5 1/4".
IB Visual Arts

Homework – Due Monday, Jan. 11
Beginning Research for Ceramic Water Receptacle

You are to begin your initial research for your ceramic water receptacle project. Go to website: http://accessceramics.org/object/

Select Vase, Vessel, and/or another form category. Go through pieces and find 5 that inspire you. Draw each of these in your sketchbook in detail to include texture, value, and form. These should be finished drawings that show time and focus. Notate next to each drawing the artist’s name, title of piece, and any other important information you feel is necessary to document the piece.
